

JULIA PRO

**Single and Dual Extrusion
400mm x400mm x 400mm**

With the widest range of Material options to choose from, Julia Pro delivers superior performance at a great value for money. Imagine the best of 3D Printing industry packaged into one massive build volume machine.

Widest Material Choice

Replacing functional metal assemblies with strong 3D Printed parts is the future of manufacturing. We will enable you to be part of such revolution with Julia Pro that works with advanced engineering materials like Carbon Fibre and Nylon composites.

Uninterrupted Printing

With Industry leading features like IMEX, Print Restore and Filament Detection, Julia Pro delivers best in class with independent direct dual drive extrusion technology with print reliability. Power cuts and Filament issues can not stop you from creating. UPS and other power management accessories are mandatory.

Smart Accessories

Julia Pro comes with a unique set of essential accessories as optional choices. These will enable you to create reliably and improve efficiency in your Material Consumption.

Connected and Ready

Monitor your live jobs online and manage print queues better with Wifi and Smart touch interface. With unique Print Preview features and on board memory, one can save multiple print files at once and access them later.

Unrivaed Support

With Fracktal Care Online* and management services# we provide world class after sales experience and deliver on our promises. From managing your filament consumption to defining your overall system ROI, we can support you and your organisation at various levels.
